PREFACE.

We present to our patrons this issue of the New Albany City Directory, believing it to be as near correct as a work of the kind can well be.

In the canvass every place of business and residence has been visited, and a great deal of care been taken to obtain the names of all persons who should figure in a City Directory. And we trust that the few errors which have unavoidably crept in, will be overlooked.

The Business Mirror contains a list of all the business houses, manufactories, professions, trades, &c., which will be found to be of much benefit as a guide to strangers visiting the city.

PRIVACY

It is a well-known fact that the privacy of the individual is one of the most important of his rights. It is the right to be left alone, to be free from the intrusion of the public, to be free from the interference of the government, to be free from the interference of the courts, to be free from the interference of the police, to be free from the interference of the neighbors, to be free from the interference of the family, to be free from the interference of the friends, to be free from the interference of the enemies, to be free from the interference of the world.
